Company

JVP Solution Inc.

Address

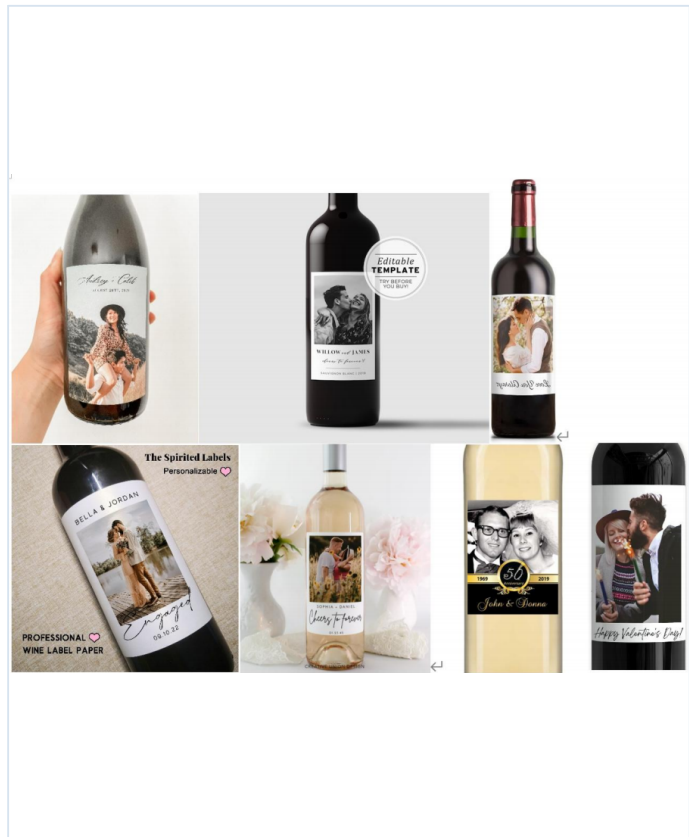

401 Wilshire Boulevard 12th Floor
Santa Monica, CA 90401-1456

Email

victor.xu@jvpsolution.com

JoySpace Photo Station is a self-service, standalone solution that transforms on-site photos into premium label-style outputs. After taking a photo, the user chooses a template, places the image into the selected layout, adjusts size and position, adds text and decorative elements, and then prints the final design on adhesive photo paper for die-cut finishing and real-world application.

The same workflow also saves the final artwork as a digital file for download and sharing across Instagram, Facebook, TikTok, Snapchat, and WhatsApp.

Event-ready workflow

Capture, template editing, printing, die-cutting, download, and social sharing in one station.

Premium editing control

Users can add text, choose fonts, apply effects, and decorate artwork with stickers, emojis, or mini graphics.

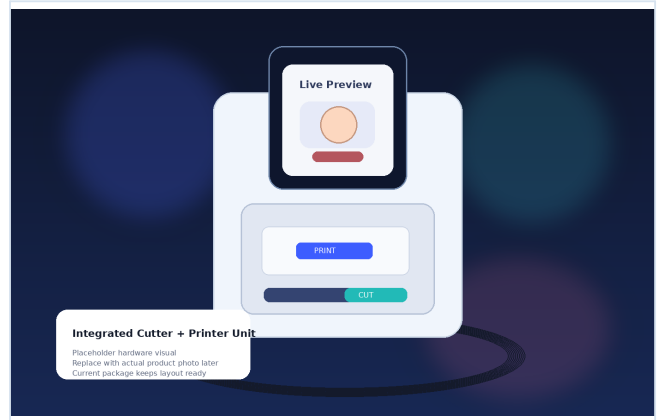

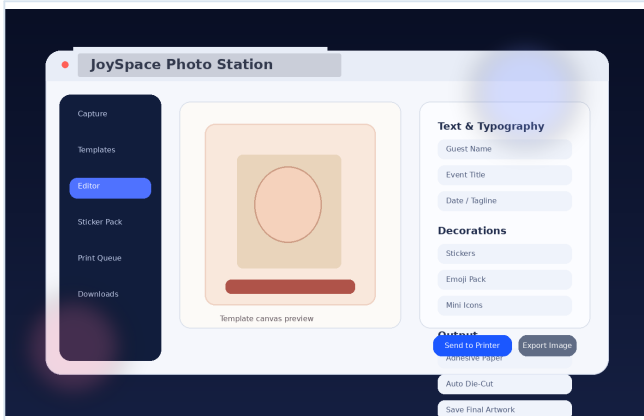

Physical + digital output

One composition becomes both a printed adhesive label and a shareable digital keepsake.

Core Workflow and Editing Experience

The system is designed around a template-based but user-controlled workflow. The photo is not forced into a fixed layout automatically. Instead, the participant actively chooses a design, adjusts composition, and personalizes the output before printing.

<p>1. Take a photo Capture an on-site portrait or event shot.</p>	<p>2. Choose a template Select a preset design that fits the occasion or product style.</p>	<p>3. Place and adjust image Scale, crop, and position the photo within the chosen layout.</p>
<p>4. Add creative elements Insert text, choose fonts, apply effects, and add stickers, emojis, or mini graphics.</p>	<p>5. Print on adhesive media Output the final composition on label-ready photo paper.</p>	<p>6. Die-cut, download, and share Finish for physical use, then save and share the artwork digitally.</p>

Key Product Features

- Template-based but user-controlled workflow.
- Text input, font selection, visual effects, stickers, emojis, and decorative mini-graphics.
- Physical and digital output in one connected flow.
- Single-station deployment for kiosks, booths, pop-ups, and live activations.

Why It Stands Out

- Suitable for winery promotions, weddings, retail campaigns, and corporate events.
- Creates finished outputs that behave like product-ready adhesive labels.
- Encourages social sharing beyond the event venue.
- Supports premium presentation for commemorative gifts and branded keepsakes.

Application Scenarios and Market Positioning

JoySpace Photo Station is built for interactive environments where a photo must quickly become a polished, gift-ready, or brand-ready output. The same system can support winery personalization, wedding favors, conference keepsakes, retail promotions, and holiday-themed branded activations.

Typical Uses

- Wine bottle personalization for weddings, winery events, anniversary gifts, and promotional programs.
- Wedding favors, welcome gifts, thank-you gifts, and personalized reception keepsakes.
- Conference gifts, annual meeting souvenirs, launch event merchandise, and client appreciation packages.
- Retail activations, mall campaigns, pop-up events, and seasonal gift customization.

Website Messaging Included

- Homepage positioning for a clean public-facing landing page.
- Detail-page copy describing workflow, editing flexibility, and output value.
- Partnership messaging for organizers, venues, wedding suppliers, and brand teams.
- Contact-ready narrative for brochures, feature sheets, and one-page introductions.

Sample Website Copy

Homepage angle

Turn every on-site photo into a custom label, a physical keepsake, and a shareable social moment.

Detail-page angle

Explain how photo capture, template editing, printing, die-cutting, download, and social sharing connect in one workflow.

Partnership angle

Position the solution as a commercialization-ready output platform for event organizers, gift providers, venues, wineries, and activation teams.

Partnership Value and Contact Information

JoySpace Photo Station is more than a photo printing tool. It is a deployable, commercialization-ready solution for event organizers, gift service providers, brand activation teams, wedding service companies, wineries, and venue operators that need a premium physical output plus a shareable digital result.

Business Benefits

- Stronger event engagement than standard photo printing.
- Premium-looking deliverables suited for bottles, favor boxes, gift packaging, and commemorative items.
- User-driven editing that increases perceived personalization value.
- Built-in bridge between offline interaction and online visibility.
- Flexible deployment for booths, kiosks, retail corners, and branded experience zones.
